

Programme

Thursday, 21 May 2026

CONFERENCE ROOM

12:00-14:30

Beginning of the conference

Introductory lecture: Neurocutaneous diseases — challenges and successes

Session I. Tuberous Sclerosis Complex (TSC): Drug-resistant epilepsy and its consequences

Epilepsy and its complications in TSC

Treatment of drug-resistant epilepsy in TSC — new antiseizure drugs

Treatment of agitation and behavioral disorders in TSC — use of cannabinoids

Ketogenic diet in drug-resistant epilepsy

Vagus nerve stimulator and surgical treatment of epilepsy in TSC

14:30-15:00

Coffee break

15:00-16:00

Corporate session I

16:15-19:05

Session II. Tuberous sclerosis complex: Organ changes

Subependymal giant cell astrocytoma (SEGA) brain tumors and their treatment — neurosurgical and mTOR inhibitors (everolimus and rapamycin)

Skin symptoms in tuberous sclerosis and their treatment

mTOR inhibitors in the treatment of skin lesions

Nephrological complications of tuberous sclerosis complex — treatment of angiomyolipoma tumors

Treatment of ophthalmological symptoms in TSC

Treatment of manifestations of cardiac tumors — surgery and mTOR inhibitors

20:00-22:00

Dinner

Friday, 22 May 2026

CONFERENCE ROOM

08:30-10:30	Session III. Neurofibromatosis Type 1 (NF1) Evolution of NF1 diagnostic criteria Neurological symptoms of NF1 and their treatment Treatment of skin lesions and plexiform neurofibromas in NF1 Treatment of neurofibromas with selumetinib
10:30-11:00	Coffee break
11:00-12:30	Session IV. NF1 Treatment of optic nerve gliomas in NF1 Arterial hypertension and treatment in NF1 NF1 genetics — other forms of neurofibromatosis Legius syndrome
12:30-13:30	Lunch and poster session
13:30-14:30	Pharma session II
14:45-16:45	Session V. Sturge-Weber syndrome Sturge-Weber syndrome: epilepsy, paresis, brain bleeding — treatment Treatment of vascular mole on the face in patients with Sturge-Weber syndrome ADHD and Conduct Disorders
16:45-17:15	Coffee break
17:15-19:00	Session VI. Other rare skin and nerve diseases Jadassohn syndrome: treatment of neurological and skin lesions — laser therapy Hippel-Lindau disease — kidney and brain tumors and retinal detachment Sleep disorders in patients with cutaneous and nervous diseases
20:00-22:00	Gala dinner

Saturday, 23 May 2026

CONFERENCE ROOM

08:30-10:00

Session VII. New techniques in the diagnosis and treatment of neurocutaneous disorders

Neurocutaneous disorders in the era of large-scale genetic testing

New techniques for the treatment of ocular lesions in neurocutaneous diseases

New dermatological techniques in the treatment of skin lesions in neurocutaneous diseases

Radiological methods in the diagnosis of organ changes in cutaneous and nervous diseases

10:00-10:30

Coffee break

10:30-11:30

Session VIII. Highlights, posters winners, and Conference summary and conclusion
